legislative standing committees with additional opportunities to do long-range planning. We have in place a process for committees to draft bills designed to be introduced and passed over a period of years. I believe this is a unique feature of our project.

A Select Committee provides overall direction and comprises six Democrats and six Republicans, equally split between the House and Senate. Our project is designed to be used over the long haul, not subject to who is governor or which party is in control of either the House or Senate.

The overall goal of the Washington 2000 project is to have a legislature that looks beyond the two-year budget cycle and recognizes that major problems require long-term solutions. We have made significant progress in a short period of time toward that goal.

Project Director, Washington 2000
